Bulletin

STATISTICAL SURVEY OF EDUCATION, 1919-20.

Statistics of schools for the year 1919-20 have appeared in separate bulletins, as follows:

- Statistics of State School Systems, Bulletin 1922, No. 29.
- Statistics of City School Systems, Bulletin 1922, No. 17.
- Statistics of Kindergartens, Bulletin 1922, No. 22.
- Statistics of Universities, Colleges, and Professional Schools, Bulletin 1922, No. 28.
- Statistics of Teachers' Colleges and Normal Schools, Bulletin 1922, No. 8.
- Statistics of Public High Schools, Bulletin 1922, No. 37.
- Statistics of Private High Schools and Academies, Bulletin 1922, No. 9.
- Statistics of Private Business and Commercial Schools, Bulletin 1922, No. 4.
- Statistics of Nurse Training Schools, Bulletin 1921, No. 51.

The statistical survey which follows includes a general summary of the statistics, showing the enrollment in public and private schools and institutions of various types, the estimated expenditures for those schools in 1919-20, the distribution of teachers among those schools, and certain combined statistics of public and private high schools reported separately to the bureau by the high schools. It includes, also, tables showing the total enrollment by States, distributed in public and private elementary, secondary, and higher educational institutions.

Graphs have been added to portray certain statistical material from the several bulletins.

TABLE 1.—*School and college enrollment, 1919-20.*

Schools.	Public.	Private.	Total.
Kindergartens.....	481,266	29,683	510,949
Elementary (primary and grammar).....	18,897,661	1,485,561	20,383,222
Secondary (high schools and academies).....	12,186,862	184,153	2,371,015
Secondary (preparatory departments of higher institutions)....	14,416	44,893	59,309
Universities and colleges.....	166,338	238,976	405,314
Professional schools.....	15,122	42,009	57,131
Teachers' colleges and normal schools:			
Teachers' colleges.....	56,940	4,966	61,906
State schools.....	78,899	9,464	100,890
City and county schools.....	12,527		
Total.....	21,910,031	2,039,705	23,949,736
City evening schools.....	586,843		586,843
Business and commercial schools:			
Day schools.....	(2)	214,606	336,032
Night schools.....		121,426	
Nurse training schools.....		54,953	54,953
Government Indian schools.....	25,396		25,396
Schools in Alaska supported by the Government.....	3,457		3,457
Other public schools in Alaska.....	3,360		3,360
Total.....	619,056	390,985	1,010,041
Grand total.....	22,529,087	2,430,690	24,959,777

¹ Not including pupils in local normal schools, when separately reported.

² Included with public secondary schools.

TABLE 2.—*School enrollment and estimated cost, 1919-20.*

Classification.	Enrollment.	Estimate per capita cost.	Estimated total cost (including outlays).
Public elementary schools (including kindergartens).....	19,378,927	¹ \$39.12	² \$756,390,383
Public high schools.....	2,186,882	¹ 127.20	² 278,179,100
Private elementary schools (including kindergartens).....	1,515,244	(³)
Private high schools.....	184,153	(³)
Universities, colleges, and professional schools:			
Public.....	195,876	466.13	⁴ 91,304,185
Private.....	325,878	456.72	⁴ 148,837,809
Teachers' colleges and normal schools:			
Teachers' colleges.....	61,906	130.96	8,107,359
State normal schools.....	78,899	190.76	15,050,611
City and county normal schools.....	12,527	126.27	1,581,726
Private normal schools.....	9,464	252.61	2,390,740
City evening schools.....	586,843	(⁵)
Private commercial and business schools.....	336,032	(⁵)
Nurse-training schools.....	54,953	(⁵)
Government Indian schools.....	25,396	213.94	5,432,930
Schools in Alaska supported by the Government.....	3,457	72.22	249,688
Other public schools in Alaska.....	3,360	102.33	343,822
Total.....	24,959,777
Total, including only those items where enrollment and cost are both given.....	⁶ 22,282,552	58.69	1,307,868,353

¹ Slightly augmented by expenses of instruction in evening schools.² Computed on basis of expenditures for elementary and secondary schools reported by 12 States, in Table 28, p. 46, Bul. 1922, No. 29, "Statistics of State School Systems, 1919-20."³ No data.⁴ Income.⁵ Included with cost of public elementary and secondary schools.⁶ Not including enrollment in private elementary and secondary schools, city evening schools, private commercial and business schools, and nurse-training schools.TABLE 3.—*Gifts and bequests to education, 1912-1920.*

SCHOOL ATTENDANCE BY YEARS OF AGE.

Attendance at public and private schools in 1920 was more general among children 11 years of age than among persons of any other age. Statistics of population and school attendance by years of age from

FIG. 1.—Per cent of children attending school at the various ages in 1920 and in 1910. (Taken from the report of the Bureau of the Census.)

5 to 20, taken from reports of the Bureau of the Census, are contained in Table 49 of the bulletin on State School Systems. The per cent of attendance for each year of age in 1920 given in that table and the corresponding per cent for 1910 taken from reports to the Bureau of the Census for that year are shown by the curves in Figure 1.

Among children 12 years old in 1920 attendance was a trifle more general than among children 10 years old, and among those aged 13 a little more general than among those aged 9. The increase in proportion of children attending school between the ages of 6 and 16, which is evident by comparing the curves for 1920 and 1910, is probably due to improvements in legislation regarding compulsory school attendance and in enforcement of existing laws. For ages 16 to 20 the curves vary but slightly, with some decrease in per cent of attendance in 1920 compared with 1910.

STATE SCHOOL SYSTEMS.

The per cent of all pupils in public elementary and secondary schools who were enrolled in high schools in 1920 was 10.2, as compared with 6.7 per cent in 1915 and 5.1 per cent in 1910.

The average number of days attended by each pupil enrolled was the same in 1920 as in 1915, namely, 121.2 days. In 1910 the average number was 113 days.

The per cent of school population in daily attendance, as shown in Figure 4, was computed from the number of pupils in average daily attendance as shown in Table 7 of the bulletin on State school systems. The term "pupils attending" refers wherever used to "pupils in average daily attendance."

In Figure 6 is shown a comparison of the length of term provided for white pupils with the length of term provided for colored pupils in public elementary and secondary schools in certain States which reported separately statistics of schools for white children and of schools for colored children. The graph shows, also, the average number of days attended in schools for each race. The statistics on which the graph is based are found in Table 37 of the bulletin on State school systems. The States have been ranked according to the length of term provided in schools for white pupils.

Data for Figure 7 regarding the per cent of men teachers in public elementary and secondary schools in 1920 and 1910 are found in Table 12 of the bulletin on State school systems. The comparison of the per cents for the two years shown in Figure 7 is not strictly accurate, in that principals and supervisors were included with teachers in 1910, but were reported separately by some States in 1920. In 1910, therefore, the number of men principals and supervisors was included with the number of men teachers. For purposes of comparison with 1910 it was not possible for the year 1920 to add to the number of men teachers the number of principals and supervisors who were men, since principals and supervisors were not reported as to sex. The total number of principals and supervisors reported in 1920 is shown in Table 10 of the bulletin on State school systems.

FIG. 2.—Per cent of children 4 to 6 years of age enrolled in public and private kindergartens, 1919-20.

Fig. 3.—Per cent of pupils in public elementary and secondary schools enrolled in high schools, 1919-20.

FIG. 4.—Per cent of school population 5 to 18 years of age in daily attendance in public elementary and secondary schools, 1919-20.

Fig. 5.—Average number of days attended by each pupil enrolled and average length of term in public elementary and secondary schools, 1919-20.

The average value of school property for each pupil enrolled increased from \$95 in 1918 to \$112 in 1920.

Data for Figure 9, showing a percentage analysis of total revenue receipts, are found in Table 17 of the bulletin on State school systems, and data for Figure 11, showing a percentage analysis of total expenditures, are found in Table 22 of the same bulletin.

CITY SCHOOL SYSTEMS.

Figure 18 shows the distribution of cities in Groups I, II, and III, according to the value of school properties per pupil enrolled. Data

FIG. 6.—Length of term provided for white pupils and for colored pupils and the number of days attended in public elementary and secondary schools in certain Southern States, 1919-20.

are found in Table 2 of the bulletin on city school systems. Figure 19, showing the distribution of cities according to the tax rate for all school purposes on the estimated true property value, is based on Table 3 of the bulletin on city school systems.

UNIVERSITIES, COLLEGES, AND PROFESSIONAL SCHOOLS.

According to Figure 21 more students were enrolled in 1920 in universities, colleges, and professional schools in New York than in any other State. Illinois and Pennsylvania were next in order. The data are taken from Table 6 in the bulletin on universities, colleges, and professional schools.

FIG. 7.—Per cent of teachers in public elementary and secondary schools who are men, 1920 and 1910.

FIG. 26.—Distribution of teachers' colleges and normal schools according to total current expenditures, 1919-20.

FIG. 27.—Pupils in secondary grades of public and private high schools to each 1,000 of total population, 1919-20.

TEACHERS' COLLEGES AND NORMAL SCHOOLS.

Data for Figures 21-26 are found in Tables 5-18 of the bulletin on teachers' colleges and normal schools.

PUBLIC AND PRIVATE HIGH SCHOOLS.

Figure 27 shows the number of pupils in secondary grades of public and private high schools for each 1,000 of total population. The data for the graph have been compiled in Table 8 from the enrollment reported in the bulletin on public high schools and the bulletin on private high schools.

The total number of public high schools which reported for 1920 was 14,326, or 375 more than the number which reported in 1918. Since 1918, the first year in which statistics of junior high schools were reported separately to the bureau, the number of junior high schools reporting has increased from 557 to 883, an increase of 326 schools, or more than 58 per cent. The increase in the total number of schools between 1918 and 1920 is not due so largely to the increase in the number of junior high schools as is indicated by comparison of the statements above. Eight hundred and twenty-eight junior high schools were housed in the same buildings with senior and regular high schools and were not counted separately in the total number of schools. Forty-five independent junior high schools were counted separately in the total number of all high schools reporting.

The enrollment in junior-senior high schools shown in Table 19 of the chapter on public high schools does not include the enrollment in independent junior high schools, although pupils in those schools are under the junior-senior plan of instruction.

In 1920, 1,857,155 pupils were reported enrolled in public high schools, excluding pupils in the seventh and eighth grades of junior high schools. In the secondary grades of private high schools, 184,153 pupils were reported. Ninety-one per cent, therefore, of all pupils reported enrolled in secondary grades of public and private high schools in 1920 were enrolled in public high schools. This is almost the same as the corresponding per cent in 1918, namely 91.2. From 1918 to 1920 the enrollment in private high schools increased 16 per cent, and the enrollment in secondary grades of public high schools increased 12.9 per cent.

The number of private high schools reporting in 1920 was 2,093, or an increase of 35 over the number reporting in 1918. The number of public high schools was 87.3 per cent of the number of public and private high schools reporting in 1920. In 1918 it was 87.2 per cent.

In 1918 the average number of pupils to a school when public high schools of all types were considered was 124.4, and in 1920 the

FIG. 28.—Pupils to a teacher in regular and senior high schools and in junior high schools, 1919-20.

number was 139.5. The increase in the number of pupils to a school is due in part to the increase in the proportion of pupils in junior high schools from 6.1 per cent of the enrollment in all public high schools in 1918 to 9 per cent in 1920. In 1920 the average number of pupils to a school in junior high schools was 205; in regular high schools, 162; and in three-year senior high schools, 158.

In private high schools the average number of pupils to a school was 88 in 1920 and 77.1 in 1918.

In public high schools of all types the average number of pupils to a teacher in 1920 was 20.5. In regular and senior high schools the average number was 19.9, and in junior high schools, 28.1, as shown in Table 9. The statistics are shown graphically in Figure 28. In private high schools the average number of pupils to a teacher was 12.3.

The average number of teachers to a school in 1920 in public high schools of all types was 6.8 and in private high schools was 7.1.

In Table 10 is shown the enrollment by years of advancement of pupils in a public high school course of four years in 1920. From this table it follows that 39.5 per cent of the pupils enrolled were in the first year of the course; 26.6 per cent in the second year; 18.8 per cent in the third year; 14.7 per cent in the fourth year; and 0.4 per cent in postgraduate and special courses. Among the years of the course the enrollment of girls was more evenly distributed than the enrollment of boys, as shown by the following per cents:

The per cent of pupils in each year of the four-year course who were boys is as follows: First year, 46.5; second year, 44.4; third year, 42.9; fourth year, 41; postgraduate and special, 37.6.

In 1918, in the first year of a high-school course of four years, 614,776 pupils were reported. If this enrollment is divided into the enrollment in the third year in 1920 in a high-school course of four years, the result is approximately the per cent of pupils surviving, namely, 54.5. If the enrollment in the first year in 1919 is considered as 658,815, which is the average of the first year enrollment in 1918 and in 1920, and if that enrollment is divided into the enrollment in the second year of the course in 1920, the per cent surviving is 71.9. The per cent of pupils surviving to the fourth year of the course in 1920 is not available because the enrollment in a high-school course of four years was not reported earlier than 1918.

In 1920 the enrollment in a high-school course of four years in public high schools was 95.9 per cent of the enrollment in secondary grades of all public high schools.

The per cent of the total population enrolled in the secondary grades of public high schools, shown in Table 1, has increased from 1.56 per cent in 1918 to 1.76 per cent in 1920.

Of all public high schools reporting in 1920, 85.6 per cent were rural high schools. A rural high school is one supported by a State, a county, a township, or a district (not in the sense of a single school district), or by an independent village which had a population less than 2,500 in 1910. Union high schools are considered as rural. A high school in a city having a population of more than 2,500 and less than 10,000 is considered rural if it is supported by a rural taxing unit; that is, by a unit larger than that determined by the corporate limits of the city proper.

In Table 11 is shown the per cent of the population 18 years of age graduated from a four-year course in public and private high schools in 1920. The table is computed from the number of graduates from such a course reported in the bulletin on public high schools and the bulletin on private high schools.

The largest public high schools which reported in 1920, and the enrollments in them, were as follows:

- (1) Polytechnic Evening High (for boys), Los Angeles, Calif., enrollment, 7,380.
- (2) Stuyvesant High School (for boys), New York, N. Y., 6,334.
- (3) Morris High School (coeducational), New York, N. Y., 5,799.
- (4) Washington Irving High School (for girls), New York, N. Y., 5,283.
- (5) De Witt Clinton High School (for boys), New York, N. Y., 5,014.
- (6) High School of Commerce (for boys), New York, N. Y., 4,235.
- (7) Manual Training High School (coeducational), Brooklyn, N. Y., 4,224.
- (8) Boys' High School (for boys), Brooklyn, N. Y., 4,067.
- (9) Erasmus Hall High School (coeducational), Brooklyn, N. Y., 4,057.
- (10) Carl Schurz High School (coeducational), Chicago, Ill., 3,855.
- (11) Manual Arts High School (coeducational), Los Angeles, Calif., 3,586.
- (12) Commercial High School (for boys), Brooklyn, N. Y., 3,531.
- (13) Northwestern High School (coeducational), Minneapolis, Minn., 3,078.
- (14) Central High School (coeducational), Washington, D. C., 2,757.
- (15) English High School (for boys), Boston, Mass., 2,591.

Each of these schools includes only pupils above the elementary grades, since none of the schools is organized on the junior-senior plan.

NURSE TRAINING SCHOOLS.

The enrollment in nurse training schools, shown in Figure 29, is that of all the schools for the training of professional nurses reporting to the bureau in 1920, and includes the enrollment in schools in hospitals for the treatment of the insane, as given in Table 9 of the bulletin on nurse training schools.

FIG. 29.—Pupils enrolled in nurse training schools, 1919-20.
